Uses of Digital Devices 1

Task 1

Education & training makes heavy use of digital devices. In the table below, identify three example devices used in your school education, and what they're used for. **(7 Marks)**

Device	Use
Online Learning	Used to access education and training through online websites. We access these devices through personal computers or mobile devices
Virtual Learning Environments	Used by teachers to upload work and resources for students to use and revise from, students can also access these resources from home.
Interactive Whiteboards	Used by teachers to display their computer screen on a bigger screen and assist them with helping teach the students.

Task 2

Our personal lives have been changed through the use of digital devices. In the table below, identify three example devices used in your personal lives, and what they're used for. **(7 Marks)**

Device	Use
Online Shopping And Banking	Online shopping and banking saves us time and energy without travelling.
Entertainment Systems	Designed for entertainment purposes such as; watching films and movies, listening to music, and play video games.
Home Appliances	We can control many of our home appliances through digital devices, such as central heating through our smartphone. This is convenient and easier to use.

Task 3

Our social lives have also been changed through the use of digital devices. In the table below, identify three example devices used in your social lives, and what they're used for. **(7 Marks)**

Device	Use
Social networking	Used to socialise with our friends and family.
Instant Messaging	Allows us to have real time text conversations with other people, for example; WhatsApp, iMessage etc

VOIP	Voice Over Internet Protocol helps us to have video or voice calls with other people, for example; Skype, and Zoom.
